Annwyl Elisabeth

A CyMAL Strategic Development Plan for Archives: 2006-2008

I am delighted to be able to write to you to express how pleased I am at the positive response of the Archives and Records Council Wales to the proposed Strategic Development Plan for Archives 2006-08. Subject to agreement by the Minister for Culture, Welsh Language and Sport, this plan will be phased in over the period 2006-08 and will form part of CyMAL's next Action Plan. We anticipate that the plan will be supported by a similar level of available annual funding as identified for 2005-2006, namely c.£175,000.

As part of CyMAL's overall strategy, this plan will need to demonstrate evidence of the contribution of the domain to core Welsh Assembly Government objectives. It is envisaged that the plan will build on existing good practice, support existing collaborative projects such as the Archives Network Wales, and encourage the development of other strategic partnerships to improve services to users and encourage new users.

I am pleased to confirm that we will proceed with the three work strands that were identified in the initial discussions between the ARCW officers and CyMAL staff.

- Resource discovery:
  National or regional partnership projects with a 100% grant offer likely to be in excess of £10,000.

- Research and development:
  Similar criteria to the existing grant programme with a challenge grant scheme for development projects (likely grant offer c. £2,000 to £10,000 funded at 75% with 25% provided as a financial contribution from the applicant) and a small grant scheme providing 100% grants up to £2,000.

- Workforce development:
  A grant programme to develop leadership skills via the Public Services Management Wales leadership programme, to increase the number of staff with professional qualifications via Archive Administration or Records Management courses and to encourage training of para-professionals via courses such as that offered by LUCAS.

It is anticipated that there will be no change to existing criteria for eligibility for funding (i.e. based on membership of ARCW and on subscription to the TNA Standard).

As I have already stated above, I am delighted by the enthusiasm of the members of the Archives and Records Council for this new agenda. It represents the first step on the way to what I hope will be some very exciting developments for the archives domain in Wales and which will bring enormous benefits both to users in Wales and more widely.

I understand that you are at the moment discussing the development of projects that may be suitable for applications under the Resource Discovery Strand of the plan. A short paper on these projects is enclosed to facilitate further discussion between ARCW officers and CyMAL staff.

Developing Archives in Wales

A discussion document on projects that could be funded by the Resource Discovery stand of CyMAL's Strategic Development Plan for Archives

Following the successful discussion day on the future of Archives Network Wales and the recent Archives and Records Council Wales meeting, CyMAL hopes to be able to work in partnership with ARCW to develop some of the projects which were identified as priorities by these meetings. This discussion document summaries the projects which ARCW has identified as priority areas for development. CyMAL hopes that this discussion document will facilitate ARCW's discussions about priorities for projects to be taken forward during the period 2006/2008. We look forward to working with ARCW to facilitate the development of these projects.
